                                                                                                                                                                   It's not that good, It speeds up way too much in some parts, I just ported the script from using other functions from another language...
Here is the working code...
Code:
#include
                                                                                                                                                            void setup()
                                                                                                                                                                              tone1.begin(11);//Playback on Pin 11, change to whatever you may need
      sudo make me a

                                                                                                                               How do I get this to work on my Arduino?

I have the code and inserted the pieces of code provided, but it doesn't compile and I'm not sure how to change it so it does
